

Palomar List

This is quick and dirty identification. This will improve and more will be added. Collected some and didn't take photos plus will combine missing ones that Lauren Found as well.

Species	photos
Acarospora	
Acarospora socialis Also possible A. robiniae which is documented locally. With no apothecia showing it is possible.	
Arthonia? K+ & C+ Violet	

Aspicilia

K+ yellow
C-

Aspicilia

Candelaria pacifica

Cladonia

Dry and hydrated

Cladonia firma

I didn't notice it before.
Will collect and map
populations

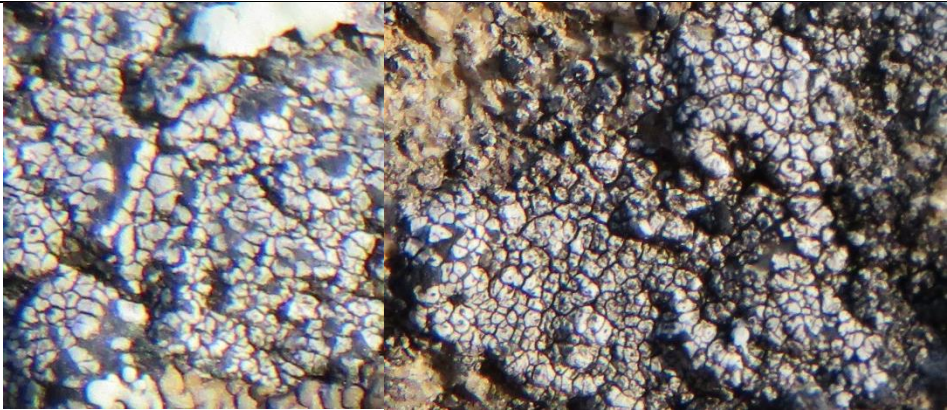

California Rare Plant
Rank: 2B.1 (rare,
threatened, or
endangered in CA;
common
elsewhere).

Dimelaena oreina

Dry and hydrated

<p>Flavoparmelia caperata</p>	<p>No photo but in collection. Photo later</p>	
<p>Lecidea?</p>		
<p>Physcia adsendens</p>	<p>No photo but in collection. Photo later</p>	
<p>Placidium?</p>		
<p>Polycauliona bolacina</p>		

Rinodina

Squamulea
squamosa

Trapelia coarctata?

Dry and hydrated

Xanthoparmelia A

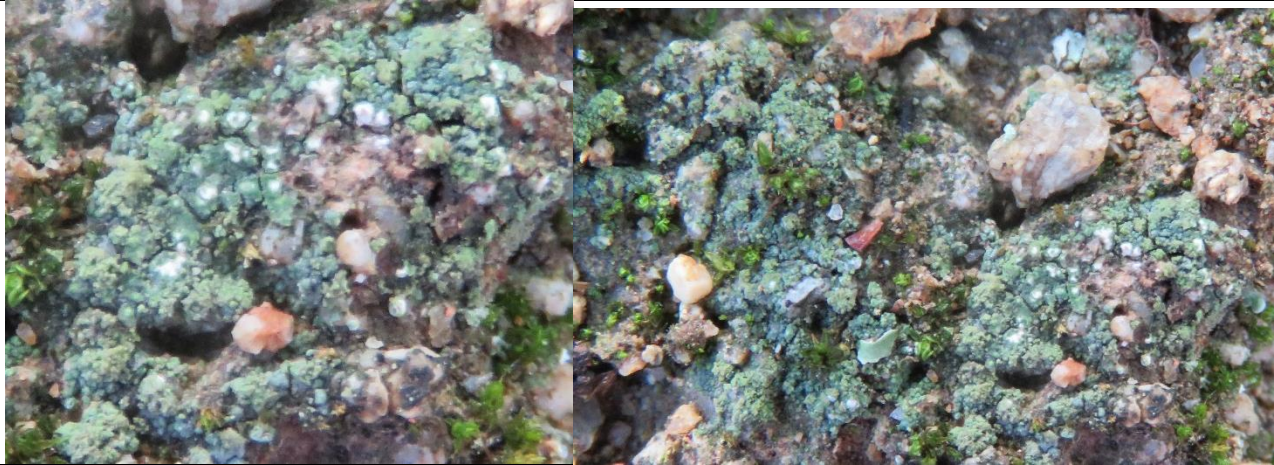

Xanthoparmelia B

Soil lichen A

Soil Lichen B

Soil Lichen C

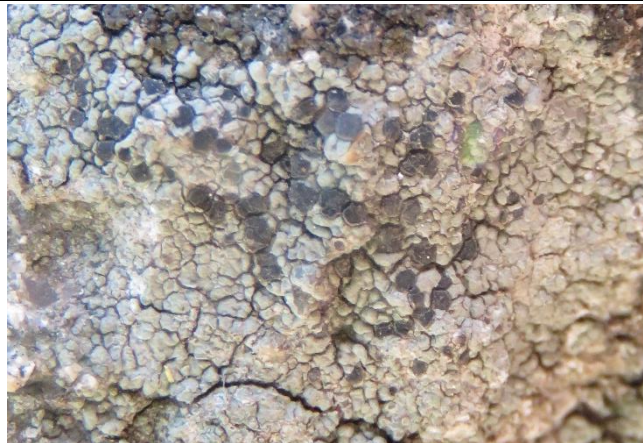

Not identified yet

Not identified yet
but possible same
as Soil Lichen C but
this one is on rock

Dry and hydrated

Not identified yet

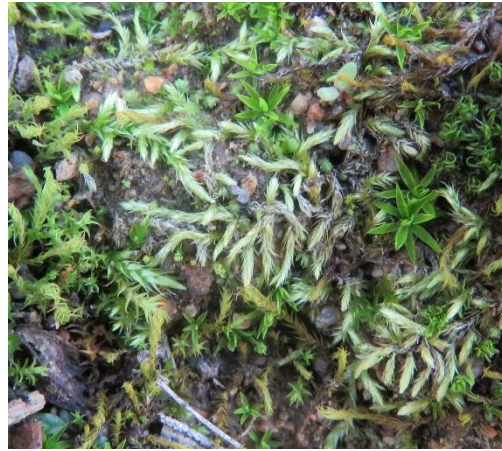

Not identified yet
hydrated

Asterella Californica

Brachythecium

Bryum sp

Bryum
argenteum/lanatum

No photo but in collection. Photo later

Fissidens

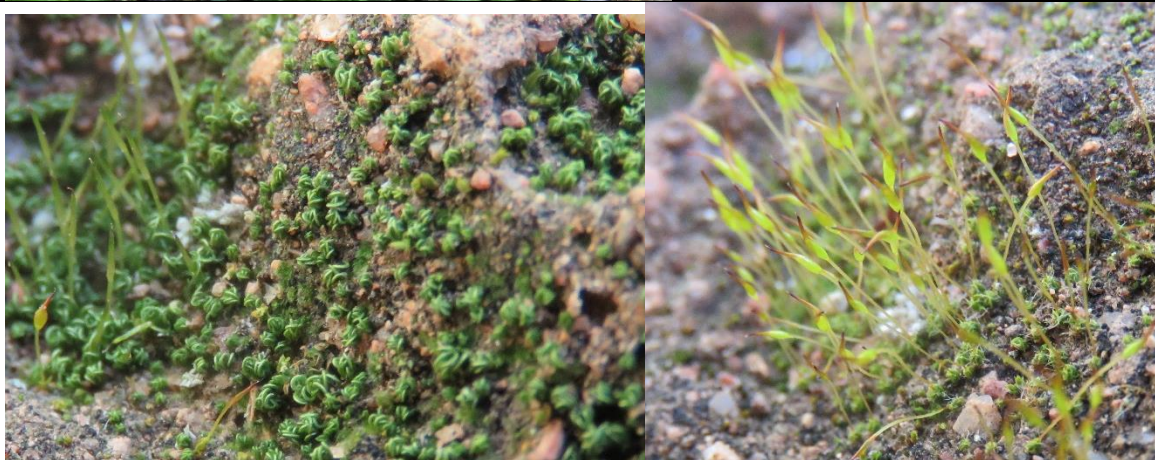

Fossumbronia

Few fissedens
sporophytes mixed in

Pottiaceae family

Didymodon?

Possibly same as
above when
hydrated

Riccia campbelliana

Riccia trichocarpa

Riccia sp.

Targiona hypophylla

Timmiella

Not identified yet
